5:00 PM Aqua-Fit Nancy	11:05 AM Aqua Power & Strength Kris		5:00 PM Aqua-Fit			

# WATER FITNESS CLASS DESCRIPTIONS

**AQUA FIT:** A low to moderate-intensity shallow water training program designed for all fitness levels and abilities. Choreographed routines will focus on a total body workout with adaptations given for lower and higher intensities to suit your needs. This is a great, well-balanced exercise option that, because of the water's properties, will leave you energized and physically fit without excessive impact on joints.

**AQUA DEEP:** This class is conducted in the deep end of the pool wearing floatation belts – appealing to individuals who like a more challenging workout and/or who require an impact-free exercise option. Unrestricted, full-range of motion movements paired with more intense routines constantly challenge your core musculature and cardiovascular system. *A great tummy blaster!*

**AQUA POWER & STRENGTH:** A total body workout in the shallow end of the pool designed to power up your cardiovascular conditioning with a focus on the core, muscle flexibility and strength. Aqua *Barre* moves may be incorporated for isometric muscle conditioning to further extend balance and agility.

**AQUA HIIT COMBO:** High-intensity interval training (HIIT) is combined with shallow water fitness routines for *a workout that will be sure to challenge even the fittest individuals!*
